STOP Commercial Assault! PROTECT Chester Park!

We, the undersigned, strongly object to a Special Use Permit being granted for the proposed Sprint Monopole (cell tower) being erected within the boundaries of Chester Park. If a Special Use Permit is granted and the tower is built, the site would then be subjected to unlimited antennae being added in the future.

In addition to the visual and aesthetic intrusion of commercial usage within the park, there is eminent danger from the emission of excessive radio waves, thus necessitating fencing and signage, warning of DANGER to those who venture near. This is totally unacceptable in a city park, especially where youth participation is so prevalent.

We further object to any and all commercial structures being located within the boundaries of any/all city parks in Duluth. Parks are set aside and designated as recreational areas for citizens to use and enjoy in a 'natural' setting without obtrusive commercial structures. Only structures used for the enhancement of recreational activities, such as ski lifts and/or buildings for community gatherings and activities should be permitted.

STOP Commercial Assault! PROTECT Chester Park!

We, the undersigned, strongly object to a Special Use Permit being granted for the proposed Sprint Monopole (cell tower) being erected within the boundaries of Chester Park. If a Special Use Permit is granted and the tower is built, the site would then be subjected to unlimited antennae being added in the future.

In addition to the visual and aesthetic intrusion of commercial usage within the park, there is eminent danger from the emission of excessive radio waves, thus necessitating fencing and signage, warning of DANGER to those who venture near. This is totally unacceptable in a city park, especially where youth participation is so prevalent.

We further object to any and all commercial structures being located within the boundaries of any/all city parks in Duluth. Parks are set aside and designated as recreational areas for citizens to use and enjoy in a 'natural' setting without obtrusive commercial structures. Only structures used for the enhancement of recreational activities, such as ski lifts and/or buildings for community gatherings and activities should be permitted.

STOP Commercial Assault! PROTECT Chester Park!

We, the undersigned, strongly object to a Special Use Permit being granted for the proposed Sprint Monopole (cell tower) being erected within the boundaries of Chester Park. If a Special Use Permit is granted and the tower is built, the site would then be subjected to unlimited antennae being added in the future.

In addition to the visual and aesthetic intrusion of commercial usage within the park, there is eminent danger from the emission of excessive radio waves, thus necessitating fencing and signage, warning of DANGER to those who venture near. This is totally unacceptable in a city park, especially where youth participation is so prevalent.

We further object to any and all commercial structures being located within the boundaries of any/all city parks in Duluth. Parks are set aside and designated as recreational areas for citizens to use and enjoy in a 'natural' setting without obtrusive commercial structures. Only structures used for the enhancement of recreational activities, such as ski lifts and/or buildings for community gatherings and activities should be permitted.

STOP Commercial Assault! PROTECT Chester Park!

We, the undersigned, strongly object to a Special Use Permit being granted for the proposed Sprint Monopole (cell tower) being erected within the boundaries of Chester Park. If a Special Use Permit is granted and the tower is built, the site would then be subjected to unlimited antennae being added in the future.

In addition to the visual and aesthetic intrusion of commercial usage within the park, there is eminent danger from the emission of excessive radio waves, thus necessitating fencing and signage, warning of DANGER to those who venture near. This is totally unacceptable in a city park, especially where youth participation is so prevalent.

We further object to any and all commercial structures being located within the boundaries of any/all city parks in Duluth. Parks are set aside and designated as recreational areas for citizens to use and enjoy in a 'natural' setting without obtrusive commercial structures. Only structures used for the enhancement of recreational activities, such as ski lifts and/or buildings for community gatherings and activities should be permitted.
