The number of individual animals and animal species in the zoo is not expected to change significantly. Some species will be added and others phased out in order to better support exhibit appeal, educational goals, and our commitment to humane animal care. Species that may be phased out include: African lion, white-tailed deer, Chinese goral, white-naped crane, Reeve's muntjac, bald eagle, great-horned owl, striped skunk, and black-tailed prairie dog. Species that may be added include: brush-tailed bettongs (Australia), Mexican gray wolves (FDZ) North American river otter (FDZ), wolverine (FDZ), American marten (FDZ), red or gray fox(FDZ), Canada lynx, bobcat, Amur leopard, Black-footed cats (Nocturnal).
