STATEMENT OF PURPOSE: This resolution authorizes an increase in the original purchase order with SHI (Software House International) by \$93,029.41 for the purchase of software to run a virtualized server environment to meet the city's growing server infrastructure needs. This purchase is payable from an ARRA (American Recovery and Reinvestment Act) grant and matching funds from the city technology and clean water funds. This project will greatly reduce the number of physical servers through the use of virtualized servers. By implementing this technology, the city will conserve energy within the data center and be better positioned for future growth. The city was awarded an EECBG (energy efficiency and conservation block grant) via ARRA funding to assist in the implementation of this solution.

This purchase is based on Minnesota State Contract No. 436392, Release C-816(5).

SHI (Software House International) is headquartered in Piscataway, New Jersey.
