STATEMENT OF PURPOSE: This resolution authorizes an annual contract with Ulland Brothers, Inc., for the purchase of an estimated 1,100 tons of fine hot mix for \$61,133.07, payable from the general fund.

These materials will be picked up by Duluth city personnel as needed during the contract year for general street repairs, utility repairs, and street improvement projects as required for the 2013 season.

The purchasing division posted the original request for bids March 19, 2013, on the city's website and received three responses by the closing date. The city determined to split the bid between the two lowest bidders who met the specifications. The purpose was to have the ability to pull from either plant depending on location, breakdowns, or other projects. This would ensure continued production days due to the lack of bituminous material from the primary vendor. Therefore, the purchasing agent awarded two contracts - one to the primary vendor Northland Constructors, who had the lowest bid and the other to the secondary vendor Ulland Brothers.
