Sec. 35-29. Construction activities affecting trees on public property.

(a) It is the intent of this Section that, whenever any construction, as defined herein, is to be undertaken affecting vegetation on public property, to the extent reasonably possible, vegetation on public property, and particularly heritage trees and special tree species, should be protected from damage or loss, unless such damage or loss or intentional removal is determined by the tree inspector to be not reasonably avoidable or is determined to be in the best interests of other vegetation located on public property or otherwise is determined to be in the best interests of the city;

(b) Whenever construction, as defined herein, is proposed, prior to the issuance of any permit for such construction, the letting of any city contract for such construction, or the performance of such construction by city personnel, the city staff responsible for issuing such permit or for designing the project to be contracted for shall consult with the tree inspector to determine the area and the vegetation to be impacted by the construction and to determine how best to implement the intent of this Article as described in paragraph (a) above. When said construction may require removing trees within city street rights-of-way, input shall be sought from the owners of property adjacent to the property where the construction activity is to take place. The initial decision on the design of the construction and the methods of work shall be that of the city staff responsible for issuing such permit or for designing the project to be contracted for in cooperation with the city forester. In the event that such staff and the city forester cannot agree on said design as it impacts affected vegetation, the final decision shall be that of the director of public works and utilities. Provided, however, in the event that an emergency situation arises with regard to which the public safety or welfare requires that construction take place in a time frame which will not permit the process set forth in this paragraph to be followed, it shall be the responsibility of said city staff to design and construct the project in a manner which is as respectful as is reasonably possible of the objectives set forth in paragraph (a) above;

(c) Preserved vegetation shall be protected from damage and soil compaction in accordance with the state of Minnesota department of transportation's standard specifications for construction, 2572.3A "protecting and preserving";

(d) Protection requirements for all vegetation on public property to be protected, as determined pursuant to subsection (b) above, shall be included in all city contracts for construction;

(e) Notwithstanding the foregoing in this Section, in the event that due to requirements imposed by state, federal or county authorities arising out of entering into cooperative or coordinated agreements or to the use of funding from such authorities, the city cannot implement the provisions of this Article without jeopardizing the subject relationship or funding, the provisions of this Article shall not apply to such agreement. (Ord. No. 8164, 7-14-1975, § 1; Ord. No. 8396, 5-1-1978, § 3; Ord. No. 8891, 5-16-1988, § 3; Ord. No. 10062, 11-22-2010, § 7.)

Sec. 35-29.1. Cutting trees for view.

(a) Not less than ten days prior to the removal of any trees from public property by the city for the purpose of improving views from public overlooks, all landowners owning property adjacent to and within 200 feet of the trees to be removed, as determined from the records of the city assessor, shall be notified by mail of the intent to do so. Removal shall be performed under the supervision of the tree inspector, provided that removal of five or more trees shall occur only after consultation with the tree commission. The requirements of this subsection shall not apply to pruning which does not endanger the health or viability of the tree pruned;

(b) Property owners desiring to remove vegetation on public property for the purpose of improving the view from private property may apply for permission to remove such vegetation to the tree

inspector. The applicant is required to demonstrate that the view obstruction did not exist at the time they acquired the property;

(c) The tree inspector shall meet with the applicant or applicants on site to review a request for removal and the condition and character of the site. Not less than ten days prior to said meeting, the tree inspector shall cause notice of the date, time and place of said meeting to be given to all landowners owning property adjacent to and within 200 feet of the trees proposed to be removed which shall invite them to attend such meeting;

(d) In the event that the tree inspector determines that more than 50 percent of the applicant's view of Lake Superior, the Duluth-Superior Harbor, the St. Louis River Estuary or the St. Louis River from any point within the above-grade portion of the applicant's dwelling is obstructed by vegetation located on public property, he or she may authorize the removal of a specified portion of such vegetation such that said view is not so obstructed. The tree inspector shall deny the request for removal if he or she finds that the proposed removal is likely to cause identifiable environmental damage to the site or to surrounding property or is likely to cause identifiable, material degradation to adjacent properties. The tree inspector shall not approve the removal of trees identified as special tree species under the authority of this Section;

(e) The applicant or applicants shall hire at their own expense a properly licensed tree service or other qualified contractor to remove the vegetation authorized to be removed by the tree inspector. Before starting work, such tree service or contractor shall meet with the tree inspector on site to insure the work is done as agreed upon. The tree inspector shall be given notice at least two business days before the work begins and may terminate the project at any time. The tree inspector shall not allow work to be done by the property owner. (Ord. No. 10062, 11-22-2010, § 8.)

Sec. 35-30. Regulations relating to trees, shrubs and plants on private property.

(a) The tree inspector shall have the authority, and it shall be his or her duty to order the trimming, treatment or removal of trees, shrubs or plants upon private property when he or she shall find such action necessary to public safety or to prevent the spread of disease or insects to trees, shrubs or plants located on public property;

(b) Any tree or shrub situated upon private property, but so situated as to extend its branches over the improved portion of a public street or highway easement, shall be so trimmed by the owner of the real property upon which the same is located that there is a clear height of 14 feet over that portion of such easement that is used for vehicular traffic, and a clear height of ten feet over that portion of such easement used for pedestrian travel, unobstructed by branches, and such persons shall remove the dead or diseased branches or stubs of such trees which are or may become a hazard to the public use of such easement;

(c) All orders to trim, remove or treat trees, shrubs or plants given pursuant to this Section shall be in writing and shall be served personally or by mail upon the owner of the property where such trees, shrubs or plants are located. Such orders shall give the owner of the property not less than ten days from the date of delivery or mailing of such notice to comply with such order. It shall be unlawful for an owner of property receiving such an order to fail to comply with such order within the specified time;

(d) If the required action is not taken by the property owner within the specified time, the tree inspector may cause the trees, shrubs or plants concerned to be trimmed, removed or treated, with the costs being borne by the property owner. If not voluntarily paid to the city by such owner, the costs of such trimming, removal or treatment may be recovered by the city by special assessment upon the property of said owner. On or before July 1 of each year, the tree inspector shall send to the city assessor a list of all unpaid charges under this Section and the assessor shall prepare and transmit to the city council an assessment roll spreading such charges against the appropriate properties. The council, after a public hearing upon at least ten days' notice by certified mail to all affected property owners, and after making whatever corrections in such assessment roll that are deemed appropriate, may confirm such assessment roll by resolution. Immediately thereafter, notice of the confirmed assessment and its amounts shall be sent by the city clerk by certified mail to the owner of each lot or parcel of land assessed. Such notice shall indicate that the assessment is due and payable on or before October 1 of the year when confirmed and that failure to make payment by such date will render the assessment delinquent. On or before the tenth of October of each year, the city assessor shall file with the county auditor a certified statement of all assessments delinquent under this Article, describing the land affected and giving the amount of the

assessment, with a penalty added, which penalty shall be set in accordance with Section 31-8 of this Code, after which the assessment shall follow the provisions of Section 70 of the City Charter. The provisions of sections 64 through 67 of the City Charter shall apply to assessments made under this Article. (Ord. No. 8164, 7-14-1975, § 1; Ord. No. 8396, 5-1-1978, § 4; Ord. No. 8891, 5-16-1988, § 4; Ord. No. 10155, 5-29-2012, § 16.)

The commission shall decide on an annual basis whether to recommend such designation to the city council, which makes designations by resolution. Heritage trees may be on public or private property, but designation of privately owned trees must be approved by the owner of the land on which the nominated tree is located in writing as part of the nomination. For the tree commission to consider a nomination, a tree must meet at least one of the following criteria:

(Ord. No. 10062, 11-22-2010, § 9.)

Sec. 35-31. Transporting or storing infectious plant materials.

(a) It is unlawful for any person to transport within the city any bark-bearing elm or oak wood without having obtained written permission from the tree inspector. The tree inspector shall grant such permission only when the proposed transporting will be done in a manner that will not result in the spread of Dutch elm disease or oak wilt disease;

(b) It is unlawful for any person to store elm logs with bark intact within the city for more than 72 hours during the period from April 1 through September 15 in any year;

(c) It is unlawful for any person to transport or store any material or horticultural product contaminated with Asian long-horned beetle, emerald ash borer or gypsy moth;

Sec. 35-32. Appeals to director.

Any person aggrieved by any decision of a tree inspector can appeal that decision to the director by causing to be delivered to the director a written appeal, setting forth the decision of the tree inspector being appealed from, all relevant facts supporting such appeal and the relief requested, which written appeal shall have been delivered not less than 14 days after the decision of the tree inspector being appealed from. The director may grant the appeal or may affirm or affirm as modified the decision of the tree inspector. The decision of the director shall be final. (Ord. No. 8164, 7-14-1975, § 1; Ord.
