Summary of Code Requirements
- UDC Sec. 50-37.3.B: Planning Commission shall review the application, conduct a public hearing ... with public notice ... and make a written recommendation to council.
- UDC Sec. 50-37.3.C: The Planning Commission shall review the application, and Council shall approve the application or approve it with modifications, if it determines that the application:
  1. Is consistent with the Comprehensive Land Use Plan; 2. Is reasonably related to the overall needs of the community, to existing land use, or to a plan for future land use; 3. Is required by public necessity, convenience, or general welfare, or good zoning practice; 4. Will not create material adverse impacts on nearby properties, or if material adverse impacts may be created they will be mitigated to the extent reasonably possible.
- The Minnesota Planning Act provides that zoning (an "official control") should implement the general objectives of the Comprehensive Plan and appellate courts have issued decisions that zoning must comply with the Comprehensive Plan or else be considered arbitrary and capricious.
Comprehensive Plan Governing Principle and/or Policies and Current History (if applicable):

Traditional Neighborhood: Characterized by grid or connected street pattern, houses oriented with shorter dimension to the street and detached garages, some with alleys. Limited commercial, schools, churches, and home-businesses. Parks and open space areas are scattered through or adjacent to the neighborhood. Includes many of Duluth’s older neighborhoods, infill projects and neighborhood extensions, and new traditional neighborhood areas.

Neighborhood Mixed Use: A transitional use between more intensive commercial uses and purely residential neighborhoods. Includes conversions of houses to office or live-work spaces. May include limited commercial-only space oriented to neighborhood or specialty retail markets.

Governing principle #1 is to reuse previously developed lands, including those adjacent to existing infrastructure.

Recent History: Prior to the adoption of the UDC in November 2010, most of the subject area was zoned M-1, Manufacturing, with a small portion zoned R-2, Two Family Residential.

The Gary New Duluth Small Area Plan was adopted by the City Council in 2014. There was a rezoning action that resulted from that study (rezoning Vintage Acres manufactured housing community in accordance with the future land use plan).

Review and Discussion Items

Staff finds that:

1) State Statute requires that a community’s zoning map implement the general objectives of the Comprehensive Plan. This proposed rezoning is to update the city’s zoning map so that it matches the community’s vision from the 2006 Comprehensive Land Use Plan. The City is amending the zoning map throughout the city, and this is one of the many rezoning actions implementing the comprehensive plan, both large and small, being proposed to the Planning Commission over the next several months.

2) The Minnesota Planning Act provides that zoning (an "official control") should implement the general objectives of the Comprehensive Plan, and appellate courts have issued decisions that zoning must comply with the Comprehensive Plan or be considered arbitrary and capricious. Good zoning practice requires that zone districts be consistent with the future land use category identified for the area.

3) Area A (in the map titled Proposed Rezoning Area Map) has a future land use designation of neighborhood mixed use, which translates into the MU-N zoning district. It is currently zoned R-1, and the current land use has several single family homes. It is north of the ME Elecmetal industrial site.

4) Area B also has a future land use designation of neighborhood mixed use. It is currently zoned MU-B. The land is city owned, and primarily undeveloped. It is north of the ME Elecmetal industrial site.

5) Area C has a future land use designation of traditional neighborhood. It is currently zoned MU-B, and the current land use is one single family homes, and several undeveloped platted parcels.

6) The purpose of the R-1 district is to accommodate traditional neighborhoods of single-family detached residences, duplexes and townhouses on moderately sized lots. This district is intended to be used primarily in established neighborhoods. Many of the dimensional standards in this district require development and redevelopment to be consistent with development patterns, building scale, and building location of nearby areas.

7) The purpose of the MU-N district is to accommodate a mix of neighborhood-scale, neighborhood serving non-residential uses and a range of residential uses located in close proximity. This district accommodates both
horizontal (uses located in separate structures) and vertical (uses located in the same building) types of mixed use. Non-residential uses may include small-scale retail, service and professional offices that provide goods and services to the residents of the surrounding neighborhood.

8) The purpose of the MU-B district is intended to accommodate modern light industrial and technology-based developments of attractive integrated design and function. The development standards for this district are intended to ensure that projects minimize adverse impacts on surrounding uses and neighborhoods, reduce impacts on the natural environment, enhance the visual quality of development and ensure the provision of adequate and cost-efficient public facilities. Intended uses include wholesaling, industrial services, research laboratories, and light manufacturing needed to support the community and region at large.

10) Based on the future land use designation, character and development history of this neighborhood and the purpose statements of the R-1, MU-N, and MU-B zone districts, rezoning as proposed in the attached map, titled Proposed Rezoning Area Map, is appropriate for this neighborhood.

11) The city, as of the date this was written, has received no formal written comments in regard to this proposal from a property owner affected by the rezoning. The city has received two phone calls asking for more information about the proposed rezoning (the City’s goal with this rezoning, potential development in the future).

Staff Recommendation

Based on the above findings, staff recommends that the Planning Commission recommend approval to the City Council of the rezoning as shown on the map titled Proposed Rezoning Area Map.

1) The rezoning is consistent with the Comprehensive Plan Future Land Use Map.

2) The proposed zone districts are the most reasonably able to implement the objectives of the Comprehensive Plan related to the proposed land use for this area.

3) Material adverse impacts on nearby properties are not anticipated.
