**Addendum #1**  
**File # 15-0412 (REBID)**  
**DFD 1500GPM Pumper**

This addendum serves to notify all bidders of the following changes to the solicitation documents:

Clarifications and responses to questions:

1. The U-bolted sub-frame statement has been removed. Will apparatus bodies mounted by u-bolts be considered?

*Paragraph four of Section 48 clearly dictates how the sub frame components are to be attached to the chassis frame. If the vendor submits a proposal that complies with the specification, and it allows for a life time warranty as articulated in the same paragraph, the bid would not be rejected for that purpose.*

2. Roll out trays have been deleted from spec. Correct?

*Section 42.10 requires a slide out tray.*

3. Deleted body material and construction methods from spec. Will steel, aluminum, or plastic apparatus bodies be considered?

*Apparatus body construction materials are covered in Section 49.*

Please acknowledge receipt of this Addendum by signing, dating, and submitting a copy with your bid/proposal. Thank you.
